DANGEROUS GOODS CONTAINERS

Tradecorp's leading industry Dangerous Goods Containers mitigate the risk of storing hazardous liquids, goods and chemicals by storing them in a safe and secure container. These containers can be modified to be equipped with ventilation, internal door release systems and stainless steel lockable valves in the bund wall to ensure all safety measures have been upheld. These containers are ideal for storing oils, paints, diesel, chemicals, class 3 flammables and any other dangerous materials. These units are easily portable and their varying size allows them to be stored in large open spaces or areas with limited space.

FEATURES

- Internal Door Release System
- Comply With Australian legislation AS1940-2004 For Storing Hazard Materials
- Ventilation Ducts
- Can Be Equipped With Additional Doors For Increased Access
- Bund floor allows for spilled chemicals to safely collect.
- lockable valve in bund wall to allow for safe discharge of chemicals
